The thyroid has two side lobes, connected by a bridge in the middle. When the thyroid is its normal size, you can't feel it. The thyroid secretes several hormones, collectively called thyroid hormones. It is produced when the thyroid gland takes iodine from your diet, combines the amino acid tyrosine

Thyroid Follicles Thyroid follicles are spherical structures filled with colloid, a viscous gel consisting mostly of iodinated thyroglobulin.

Thyroid follicles are enveloped by a layer of epithelial cells, called follicular cells, which in turn are surrounded by parafollicular cells. These 2 parenchymal cell types rest on a basal lamina, which
