Use Briggs & Stratton SAE 30W Oil above 40°F (4°C) for all of our engines. Check oil level regularly. Air-cooled engines burn about an ounce of oil per cylinder, per hour. Fill to mark on dipstick. DO NOT OVERFILL. Step 1: Getting Started. Start the engine and run it until it is warm. Stop the engine.

My Briggs and Stratton 4 hp engine (10A902-0171-01) surges a few moments after a cold start, and then speeds up and dies. It will start again after priming. When warm it does the same. Any suggestions? Is there an idle mixture screw accessible? Or dirt. It is an old engine, but ran well up until this just started.
