### Depollution System Faulty Peugeot 207

Peugeot 207 ECU - common anti pollution fault. This Peugeot 207 ECU is a very common failing unit that affects vehicles built between 2007 and 2015 with the standard 1.4 and 1.6 litre engines and also the higher powered VTi and GT CC versions. We see a lot of these 207 ECUs failing, causing the 'anti pollution fault' message to be displayed, failure of the coolant temperature sensor/gauge, with a constant overheat warning light on the dashboard, this will also cause the coolant fan to run ...

### Peugeot 207 anti pollution fault - ECU Testing

Peugeot 2007 depollution system faulty warning light Sadly a common fault with 207s is random fault warnings coming up on the display. If it's a real fault, then you should notice a fall off of performance and this indicates a trip to your garage to get it fixed.

### SOLVED: Peugeot 207 depollution system faulty - Fixya

I have a 2008 Peugeot 207, 1.6 Turbo and lately the depollution system is faulty - the check engine sign lit. The car still has the power of a 1.6 engine but the turbo is not working. One mechanic told me to remove the CAT and the problem will be fixed, but when I asked another mechanic he told me that if I remove the CAT the engine will be at risk of breaking and in few weeks i would need a new engine.

### Peugeot 207 depollution fault - Motor Vehicle Maintenance ...

In this guide, you will learn what it means when Peugeot check engine light stays on or engine management system faulty comes up. Illuminated Peugeot check engine light means that there is a malfunction of the engine or emission system. This problem is often caused by a faulty spark plug, ignition coil, mass airflow sensor, oxygen sensor, or a loose gas cap.

### Peugeot Check Engine Light Stays On | Engine System Faulty ...

My Peugeot 207 16 autom sport showed depollution system faulty and drove like a dog, it came on after having a new fan belt fitted, i took it back and the garage advised me to get rid of it as its an ongoing fault with such cars, the second garage advised to go to Duff Morgan in Norwich, they charged me over £770 for a computer diagnostic and parts from France, after a month its back again, i only do low mileage and every service is recorded correctly, its history is spot on .So here we go ...

### depollution system faulty? | Mend Peugeot Cars | how to ...

peugeot 207 /2008 - depollution system fault - Railroad. Once upon a time cars needed regular routine maintenance and running repairs. Contact breaker points, ignition timing, carburettor, valve clearances, grease points, brakes etc all needed regular attention, and eventually structural corrosion would send it to the scrap yard.

### peugeot 207 /2008 - depollution system fault | Technical ...

Get the fault codes read. Could be damn near anything. My mother has a 207SW, same age. It popped up an APF a couple of years back - just needed a seemingly transient fault code clearing (fuel pressure), and it's been fine ever since.

## **Help! Peugeot 207sw anti pollution fault ...**

My fishing car (5 door 207, 80,000miles) gave me a warning today on the way to the lake. I decided to turn around and use my main car, risking dirtying/smellying it up and scratching the seats. Warning was 'Depollution System Faulty', which seems to point to a myriad of different things from a bit of googling.

## **'Depollution System Faulty' Damn you Peugeot ...**

About a month ago. my 207 1.6 Diesel suddenly brought up the engine management light with the message Depollution System Faulty. I could not rev above 3000 and then it just died. After a few seconds I can restart it but only get a short distance before it dies again.
