Many books explore the effects of environments on people, but there are few that examine the complexities of campus settings and how they contribute to student learning and success. "Educating by Design" fills the information gap by providing a comprehensive model for creating student-friendly and learning-supportive campus environments.The authors draw from decades of research and experience to present an integrated framework for assessing and understanding academic environments.

Educating by Design : Creating Campus Learning ...
In our research, we found that the most successful learning environments are diverse, adaptable, and multimodal. Granted, new learning spaces can be designed with more nuance than a garage, but the goal is to inspire student engagement and fuel the learning process, and that requires room for students to test ideas and get a bit messy as they do it.

9 design concepts for creating collaborative student ...
When you define the course goals, focus on student learning. One way to formulate these goals is to determine what students should be learning in terms of content, cognitive development, and personal development. Be as specific as you can and make sure that the goals define learning in ways that can be measured.

Designing a Course | The Center for Teaching and Learning
It may be that pursuing effective university-driven innovation programs and facilities will involve equally innovative strategic approaches to design and development—for example, decoupling innovation centers from any single departmental steward and, perhaps, from institutional ownership overall. Planning for places that foster effective innovation is still an emerging process, but the constant pressure on universities to do so continues from two of their key institutional ...
