There are tons of genres and formats (ePUB, PDF, etc.) to choose from accompanied with reader reviews and ratings.

### Geometry Benchmark 14 Answers

This benchmark tests a GPU's ability to use two features in Direct3D: render target array and geometry shader. A render target array allows multiple render target and depth stencil textures to be active simultaneously. By using an array of six render targets, one for each face of the cube texture, all six faces of the cube can be rendered together.

An interesting benchmark to see an alternative approach for Raytracing there are quite a few bugs with the program though, namely settings are not remembered upon exiting and re-launching the program. It is also surprising that the program still has not been updated for DX12, Vulkan, or to leverage the dedicated hardware with RTX series cards.

TryGetValue will be faster. ContainsKey uses the same check as TryGetValue, which internally refers to the actual entry location.The Item property actually has nearly identical code functionality as TryGetValue, except that it will throw an exception instead of returning false.. Using ContainsKey followed by the Item basically duplicates the lookup functionality, which is the bulk of the ...
