Always use the recommended type of transmission fluid in your vehicle, as referred to in your owner's manual. Typical fluid change intervals for automatic transmissions range from 40,000 to 60,000 miles depending on the severity of the usage. See your owner's manual. In addition to fluid replacement, it is important to regularly check your transmission fluid level. A low transmission fluid level can cause the vehicle to shift improperly or not at all.

...

In fact, many modern manual transmissions actually spec for automatic transmission fluid instead of a traditional gear oil. Regardless of what your manual transmission uses, the fluid or oil's primary function is lubrication—preventing metal-to-metal contact between the meshing gears. Gear oil is different from engine oil.

The original Dexron (B) fluid, as well as earlier GM transmission fluids, used sperm whale oil as an additive to coat internal transmission parts to prevent corrosion and rust. The U.S. Endangered Species Act banned the import of sperm whale oil, so the Dexron (B) fluid additive package had to be reformulated.

### **DEXRON - Wikipedia**

Does anyone know if 75w-90 GL-4 gear oil will work in our manual transmissions. I found 3 quarts of this stuff sitting out in my garage from when i had my Volkswagen never used. I looked in my owners manual but it doesn't list a spec under the manual transmission fluid it just states "GM Manual Transmission Fluid 89021906"
