Finning for propulsion involves methods of producing thrust with the intention of linear motion through the water on the long axis of the body. [1] There is a trade-off between speed and energy efficiency for all styles of finning, as drag is proportional to the square of the speed, the drag coefficient, which is affected by streamlining, and ...

A scuba set is any breathing apparatus that is carried entirely by an underwater diver and provides the diver with breathing gas at the ambient pressure. Scuba is an acronym for self-contained underwater breathing apparatus. Although strictly speaking the scuba set is only the diving equipment which is required for providing breathing gas to the diver, general usage includes the harness by ...

Solubility is the property of a solid, liquid or gaseous chemical substance called solute to dissolve in a solid, liquid or gaseous solvent. The solubility of a substance fundamentally depends on the physical and chemical properties of the solute and solvent as well as on temperature, pressure and presence of other chemicals (including changes to the pH) of the solution.
