A mathematical game is a game whose rules, strategies, and outcomes are defined by clear mathematical parameters. Often, such games have simple rules and match procedures, such as Tic-tac-toe and Dots and Boxes.Generally, mathematical games need not be conceptually intricate to involve deeper computational underpinnings.

Mathematical game - Wikipedia

A noted expert presents clearly written discussions of essential ideas related to the highly useful mathematical approach to human behavior and decision-making. His lucid, accessible treatment examines such concepts as "utility," "strategy," and the difference between "non-zero" and "zero-sum" games. A minimum of mathematical prerequisites makes it accessible to non-mathematicians. 1970 edition.
