an established framework. This will maximize maintainability. 2) how important is r...

## **What programming language should I use in order to build ...**

The most effective way to do this is to ensure that inviting other users is a core process in your application, rather than something that people are asked to do as an afterthought. In other words, the most viral applications are those that involve inviting others to the application as part of the daily usage.

## **How to make your application viral | danieltenner.com**

The creation of a successful viral loop in a mobile application lies in its design. The app needs to be engaging, with content worth sharing, while at the same time not being intrusive. The path towards the creation of a viral loop in a mobile app may not be the easiest one, but the efforts can be very rewarding.
