### Staff View: Short Stay Management of Atrial Fibrillation

After atrial fibrillation, atrial flutter is the most important and most common atrial tachyarrhythmia. Although it was first described 80 years ago, techniques for its diagnosis and management have changed little for decades. The diagnosis rested almost entirely with the 12 lead ECG, and treatment options included only the use of a digitalis compound to slow and control the ventricular ...

### Guideline Atrial fibrillation: management

Atrial fibrillation is often caused by rapidly discharging triggers, or "hot spots." In catheter ablation to treat atrial fibrillation, a doctor inserts long, thin tubes (catheters) into your groin and guides them through blood vessels to your heart.
