The Herds Shot Round The

Wolf hunting is the practice of hunting gray wolves (*Canis lupus*) or other species of wolves. Wolves are mainly hunted for sport, for their skins, to protect livestock and, in some rare cases, to protect humans. Wolves have been actively hunted since 8,000 to 10,000 years ago, when they first began to pose a threat to livestock vital for the survival of Neolithic human communities.

Two herds in northwest Alberta stood out — those on the sites of the Smoky River, Gregg River and Luscar coal mines. "(Levels in) bighorn that occupied coal mines were miles away from everybody," he said. Both herds averaged well outside the safe range for selenium. One of them almost doubled that level.

Body camera video of 13-year-old shot by Chicago police ...

The passenger pigeon or wild pigeon (*Ectopistes migratorius*) is an extinct species of pigeon that was endemic to North America. Its common name is derived from the French word *passager*, meaning "passing by", due to the migratory habits of the species. The scientific name also refers to its migratory characteristics. The morphologically similar mourning dove (*Zenaidura macroura*) was long thought to ...
